

Conservation during COVID-19

Staying committed to [SustainableBreck Goals](#)

Recycle Right

Recycling Centers are still open

- Check out our [blog](#) to be sure you are Recycling Right.
- More recycling [resources](#) are available from High Country Conservation.
- Use HC3's [Recycling Robot](#) for hard to recycle items.

Eco-Friendly Cleaning

- It is possible to maintain a healthy and clean space while protecting the planet.
- Try some of our [eco-friendly cleaning tips](#) to reduce waste when cleaning.
- Think reusable rags and less plastic.

- Toilets are not trash cans, wipes (even the “flushable” kind) clog pipes and cause issues at the Water Treatment Plant.
- All wipes belong in the trash.
- Use a disinfectant spray and a reusable rag and launder often.

Drive Less

- Reduce your carbon footprint by biking or walking instead of driving
- Telecommute to reduce emissions and stay safe at home
- Driving is a leading source of air pollution and harms our health, especially during COVID-19

Reusables are Safe

- While disposable bag fees have been suspended, there are no studies showing the virus can live on [bags](#).
- Reusable bags can still be used at stores, be sure to follow proper cleaning guidelines.
- Breckenridge's tap water is Purity at It's Peak and is safe for drinking.
- Refill your reusable water bottle and save plastic.

Keep Breck Green & Clean

Ensure disposable masks and gloves end up in the trash and not in the street. Help by picking up trash while taking a walk in your neighborhood.
